Purpose

To provide guidance and instructions to users on how to access Internet Reports using the updated version of Cognos Analytics. It has a new user interface requiring users to follow new user login protocol. In addition, the user interface has been restructured including new menu, navigation bars, and reporting folder structures.

Requirements, Recommended Operating System and Web Browser (MFA)

Requirements	Recommended Operating System	Recommended Web Browser
Local admin rights is required to access Incognito or InPrivate mode. Refer to your agency's IT to check if you have local admin rights to access Incognito mode or InPrivate mode on your browser.	Windows 10 must be at least 22H2. System must be up-to-date.	Chrome 132.0.6834.160 or higher Chromium-based Edge Browser 132.0.2957.127 or higher

Do NOT use Internet Explorer.

Do NOT click the back button or it will create duplicate profiles.

Use Google Chrome or Microsoft Edge Chromium.

We will be setting up the Multi-Factor Authentication in **Incognito mode** in Google Chrome or **InPrivate** browsing in Microsoft Edge Chromium.

We have to use this method as we are establishing a new Microsoft account and if your organization already uses Multi-Factor Authentication it will cause conflicts with existing accounts.

Multi-Factor Authentication (MFA) Setup and Contract Provider Account Password Reset Guide

- Step 1: Call the DMH Help Desk at 213-351-1335 to get a **temporary** DMH password to setup MFA.
- Step 2: Once MFA is setup, go to the password section on the MFA Setup and Contract Provider Account Password Reset Guide (link below) to change and create your own DMH password. Failure to change/create your own DMH password will have implications in accessing DMH applications. To access DMH applications, you must setup MFA and have a current DMH password.

Please click on the link below and follow the MFA Setup and Contract Provider Account Password Reset Guide: <https://lacounty.sharepoint.com/sites/sas/Public/Forms/AllItems.aspx?id=%2Fsites%2Fsas%2FPublic%2FDMH%20Contractors%20Instructions>

Requirements, Recommended Operating System and Web Browser (Ivanti & Cognos)

Requirements	Recommended Operating System	Recommended Web Browser	Required Ivanti Secure Client (version 22.7.1)
<p>Local admin rights is required to install Pulse Secure.</p> <p>Refer to your agency's IT to check if you have local admin rights to install Pulse Secure on your computer.</p> <p>Uninstall older version of Pulse Secure</p>	<p>Windows 10 must be at least 22H2. System must be up-to-date.</p>	<p>Chrome 132.0.6834.160 or higher Chromium-based Edge Browser 132.0.2957.127 or higher</p>	<p>22.7.1 (MSI) 22.7.1 (DMG)</p>

A way to uninstall older version of Pulse Secure from your computer (There's no need to uninstall older versions unless you are having issues installing the new version.)

Pulse Secure is typically installed in the C:\Program Files (x86)\Pulse Secure\Pulse folder; however, this location may vary depending on the user's choice when installing the application. The entire uninstall command line for Pulse Secure is C:\Program Files (x86)\Pulse Secure\Pulse\PulseUninstall.exe.

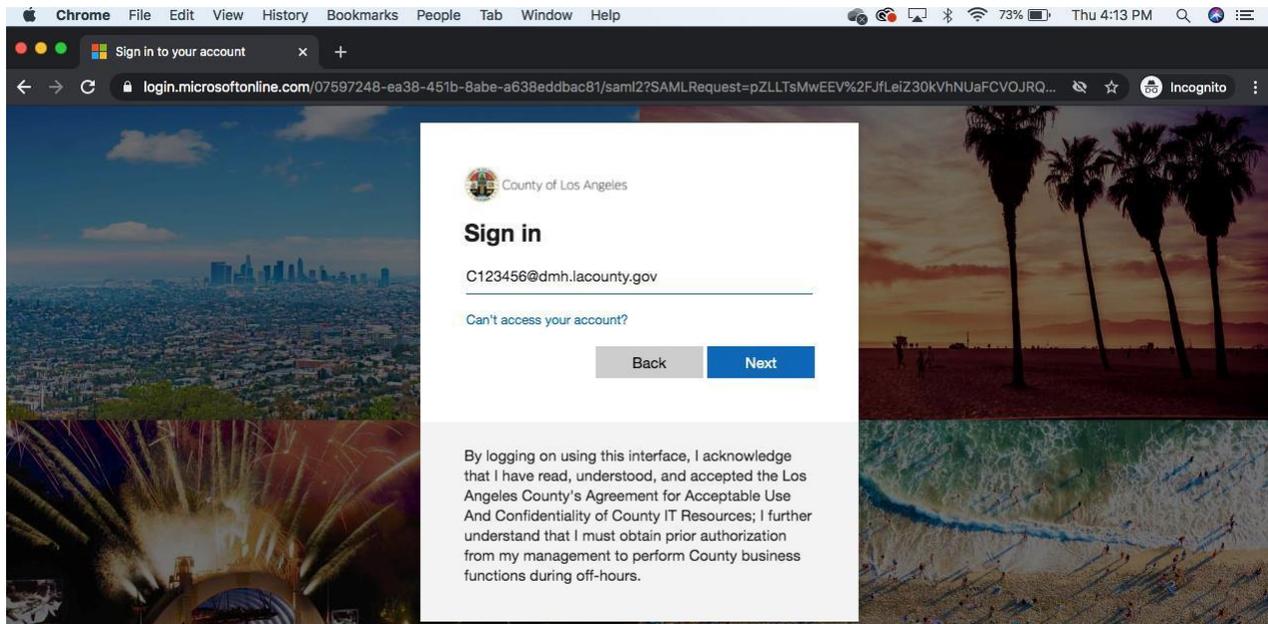

Note: Administrator rights is required to uninstall properly.

Los Angeles County Mental Health SSLVPN – DMH Contractor Login

To access the **DMH Contactor Login** page, navigate to DMH Contractor page:

<https://era.lacounty.gov/dmh/contractor/mfa>

USERNAME: c+ContractorID@dmh.lacounty.gov **Example:** c123456@dmh.lacounty.gov
PASSWORD: Hosted Password

Contact DMH Help Desk at 213-351-1335 to get your SSL VPN password reset

Ivanti (Pulse Secure)

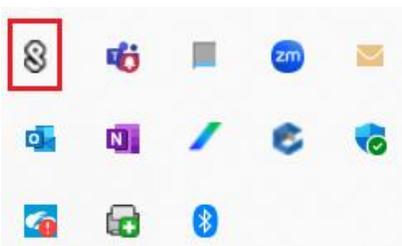

We would like to inform you of an important update regarding the acquisition of Pulse Secure by Ivanti. As a result of this acquisition, Pulse Secure is now officially rebranded as Ivanti.

Please be aware that while the product functionality and support will remain consistent, there will be updates to all SSLVPN product names from “Pulse Secure” to “Ivanti”, and branding that reflect this change. There will no changes to how users operate SSLVPN client or web URL portals for remote access to county internal applications and the access level of the user will remain the same however users will notice an enhanced interface within SSLVPN web portal.

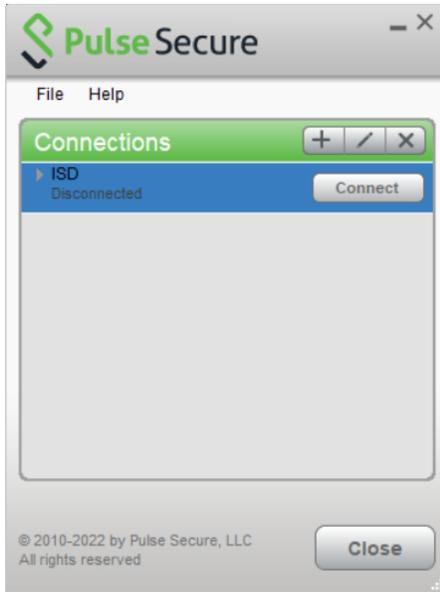

Please refer to below screenshots for how the Pulse Secure client changes will look like:

Before Rebranding:

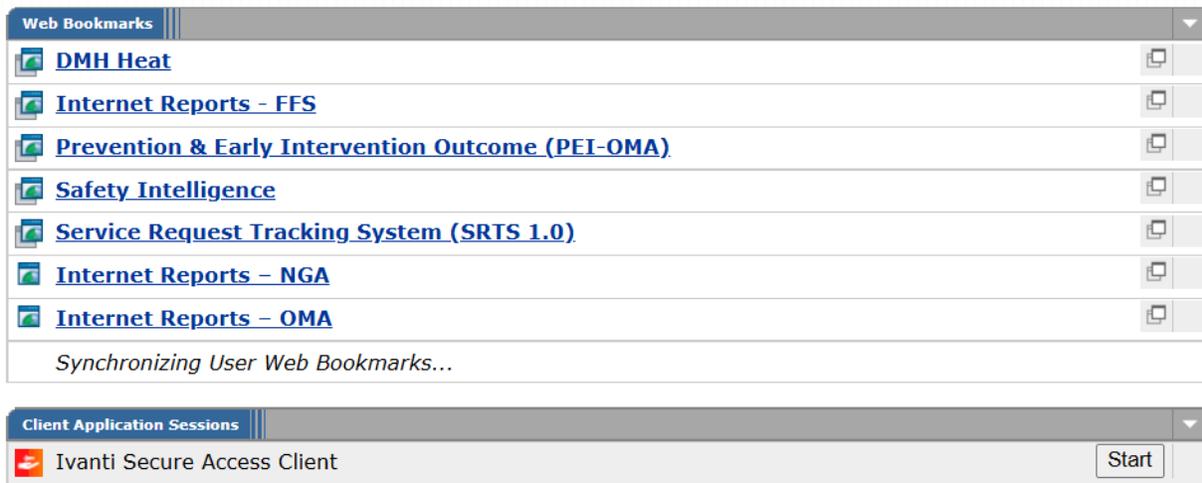

1. The SSLVPN desktop client icon in the System Tray will be displayed as follows:

2. The SSLVPN desktop client user interface will be displayed as follows:

3. The SSLVPN Web Portal user interface before rebranding was displayed as below:

4. If you are logged out, the re-login web page before rebranding was displayed as below:

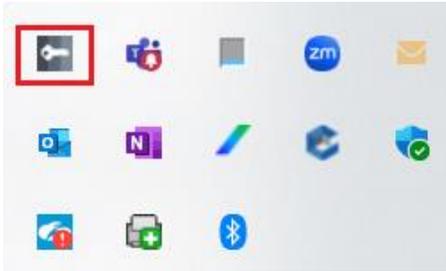

Los Angeles County
Internal Services Department SSL VPN

Your session has ended. For increased security, please close your browser.

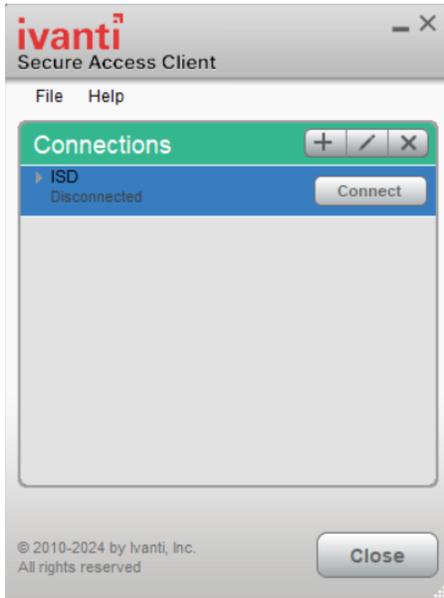

[Click here to sign in again](#)

After Rebranding:

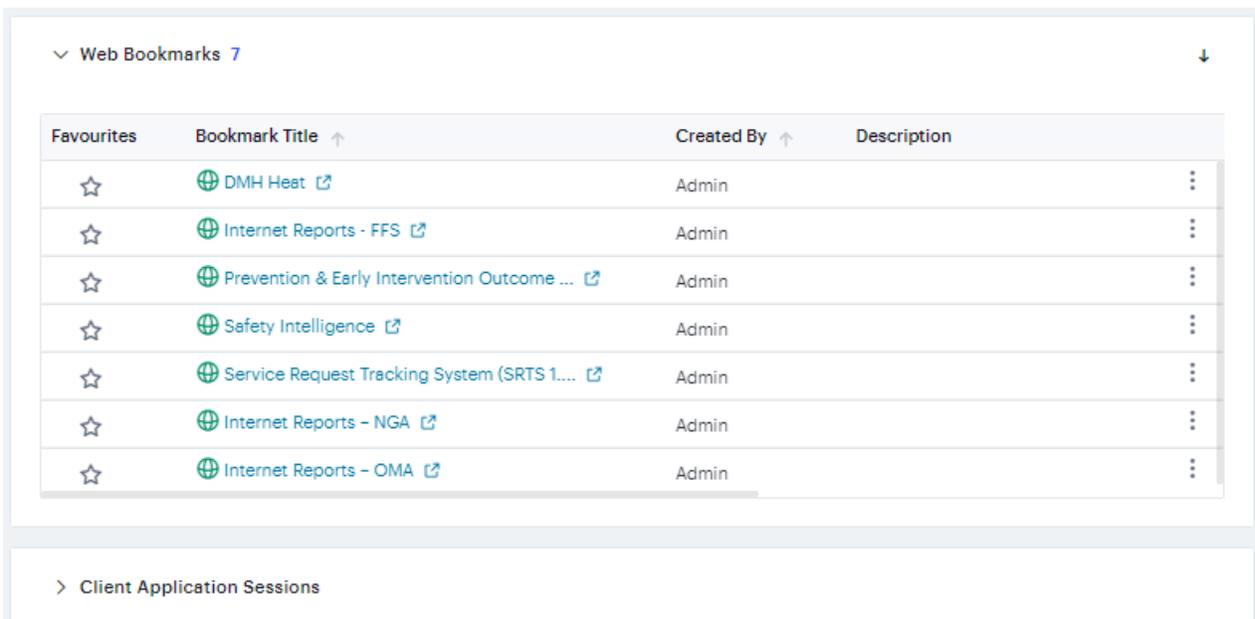

1. The SSLVPN desktop client icon in the System Tray will be displayed as follows:

2. The SSLVPN desktop client user interface will be displayed as follows:

3. The SSLVPN Web Portal user interface after rebranding would be displayed as below:

4. If you are logged out, the re-login web page after rebranding would be displayed as below:

Your session has ended. For increased security, please close your browser.

[Click here to sign in again](#)

To update or install the required Ivanti (Pulse) Client, click on the link below and locate the necessary installer in one of the folders displayed:

CGO-Access PUB > DMH Contractors Instructions

Important Note: The new client needs to be updated as of **1/31/25**. Any older clients will no longer be supported so successfully accessing DMH resources cannot be guaranteed. Here is the [new link](#) for Ivanti Client that needs to be installed on your computer.

<https://lacounty.sharepoint.com/:f:/r/sites/sas/Public/DMH%20Contractors%20Instructions?csf=1&web=1&e=MdbLe2>

ps-pulse-win-22.7r1.1-b29163-64bit-installer.msi	4 days ago	Venkata Nagumotu

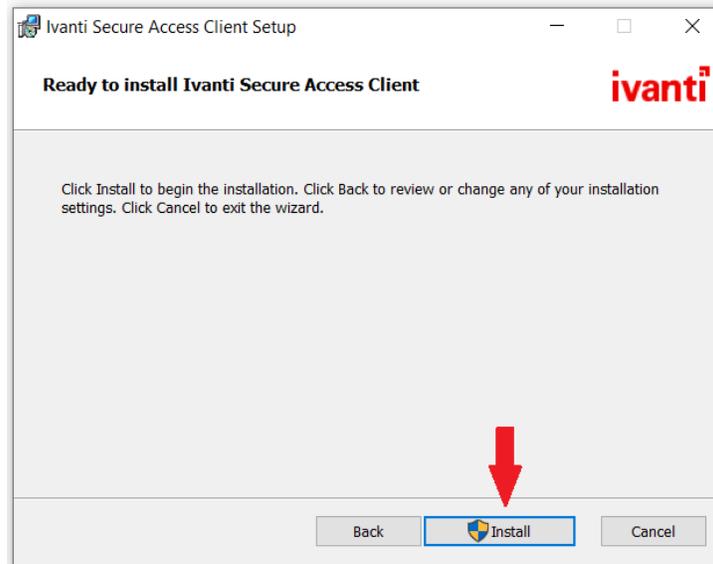

Click Download.

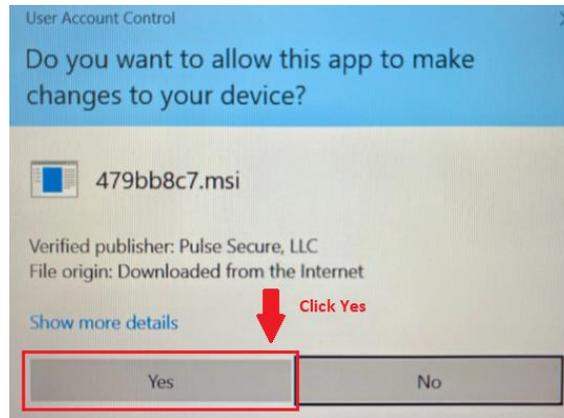

Click Next.

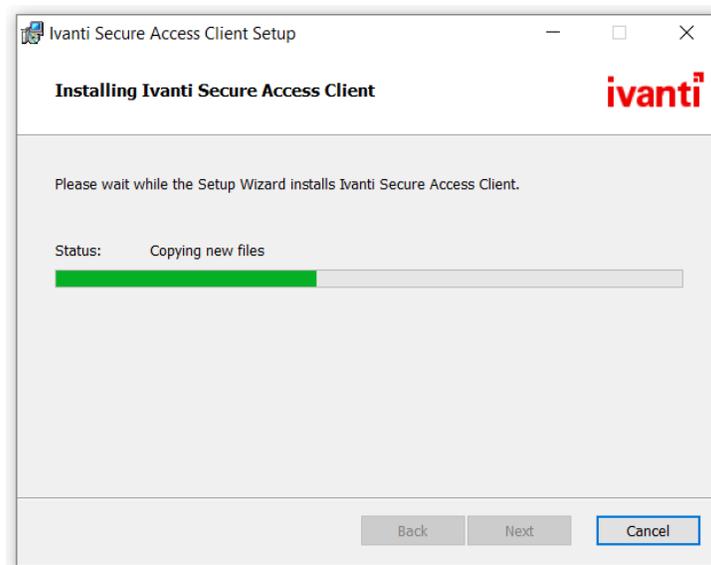

Click Install to begin the install process.

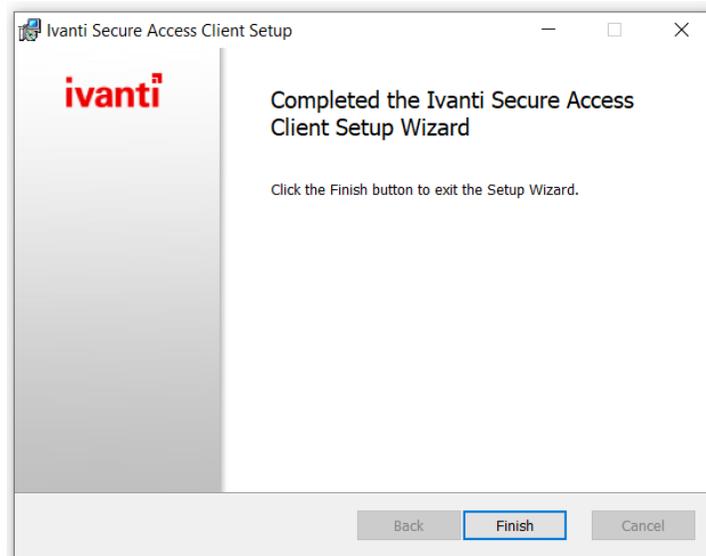

Click Yes, if prompted by the UAC control (See Image below).

Wait for the installation of the Ivanti Secure Access Client to complete.

Click Finish to complete the installation of Ivanti Secure Access Client.

For first time users

You will need to also install the “Pulse Secure Application Launcher” by clicking on the link below and waiting for the Host Checker to fail and redirect the SSLVPN site: <https://era.lacounty.gov/dmh/contractor/mfa>

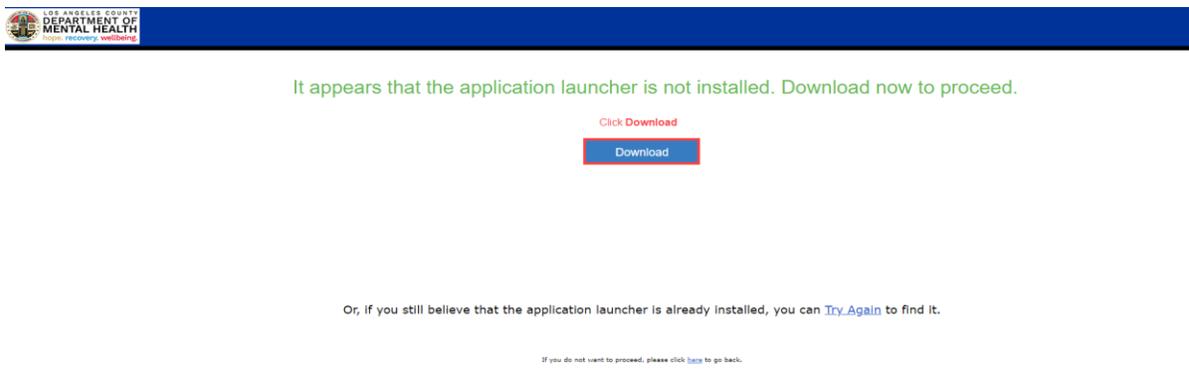

Loading Components...

Please wait. This may take several minutes.

- Host Checker.

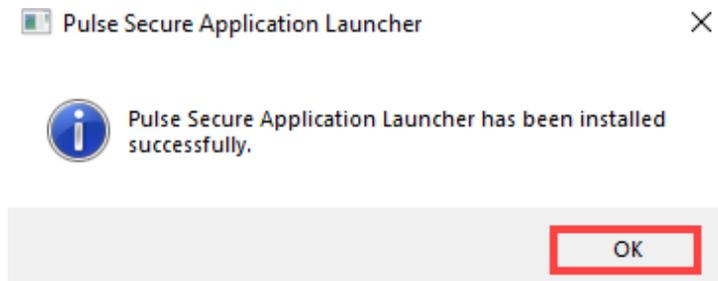

If an error prevents a component from loading properly, you can [click here](#) to continue. Not all functionality may be available.

Click the Download button to obtain the Pulse Secure Application Launcher installer.

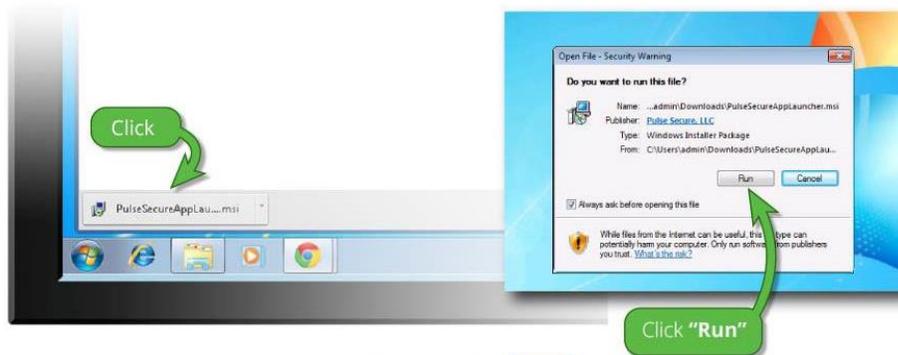

Double click on the software installer for the Pulse Secure Application Launcher. When the installer is complete, click OK as shown below.

Downloads				▼	🔄	Search Dow
Name	Date modified	Type	Size			
▼ Today (1)						
PulseSecureAppLauncher	1/29/2025 11:22 AM	Windows Installer ...	7,096 KB			

Locate the link labeled “HERE”, and click on it to resume the process to launch the LA County SSLVPN website.

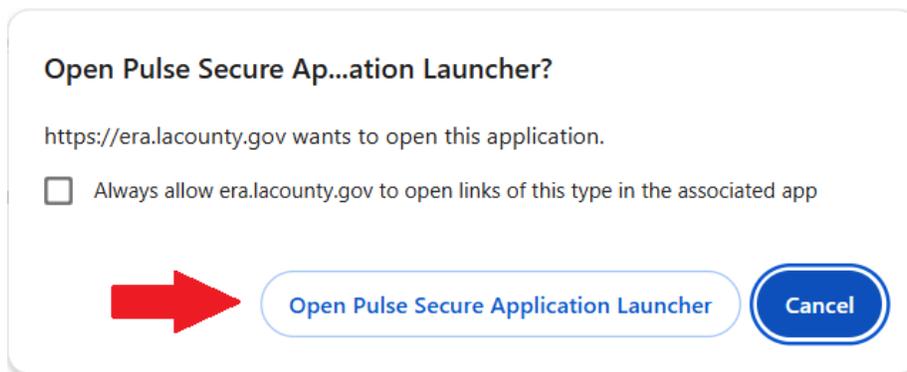

After the application launcher has completed downloading, follow these installation steps.

Once you have completed the above steps, click **HERE** to continue with the launch. We recommend selecting "remember" and "always" during the installation process.

If you do not want to proceed, please click [here](#) to go back.

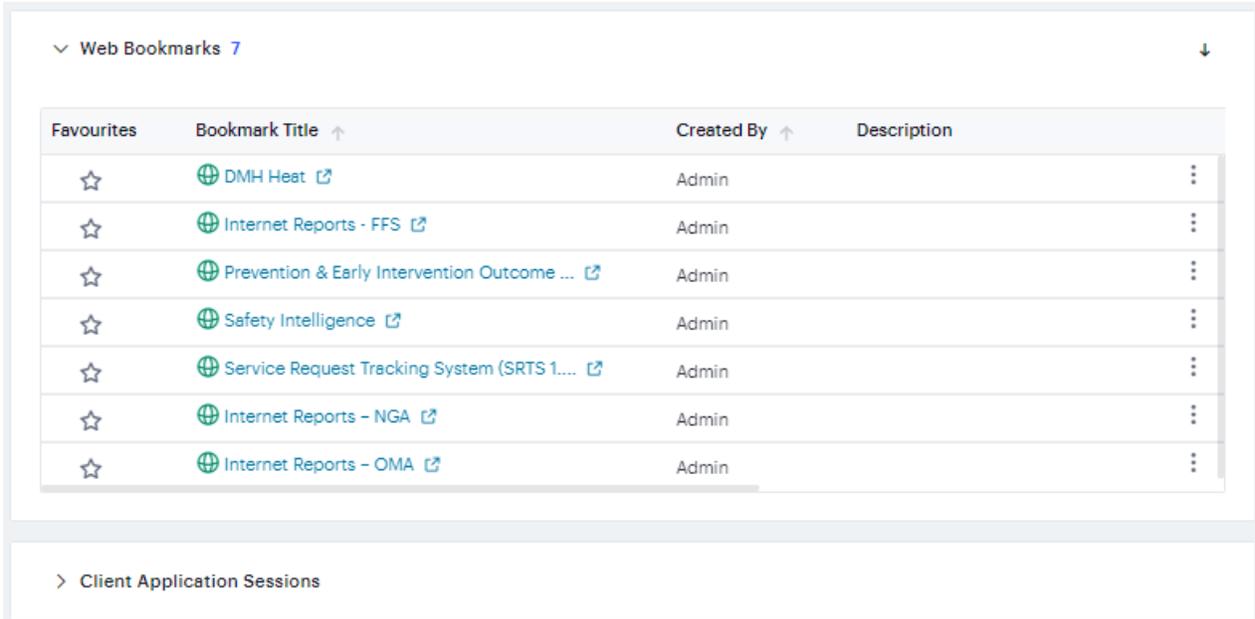

When the application launch is invoked by the web browser click Open Pulse Secure Application Launcher

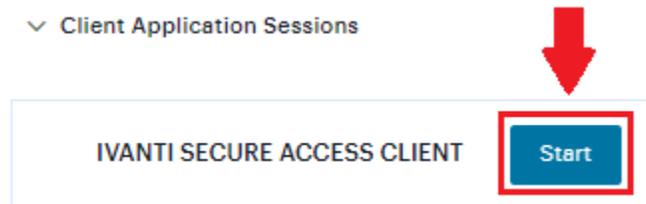

When prompted to trust the download and installation of the Host Checker from the era.lacounty.gov server click on Yes.

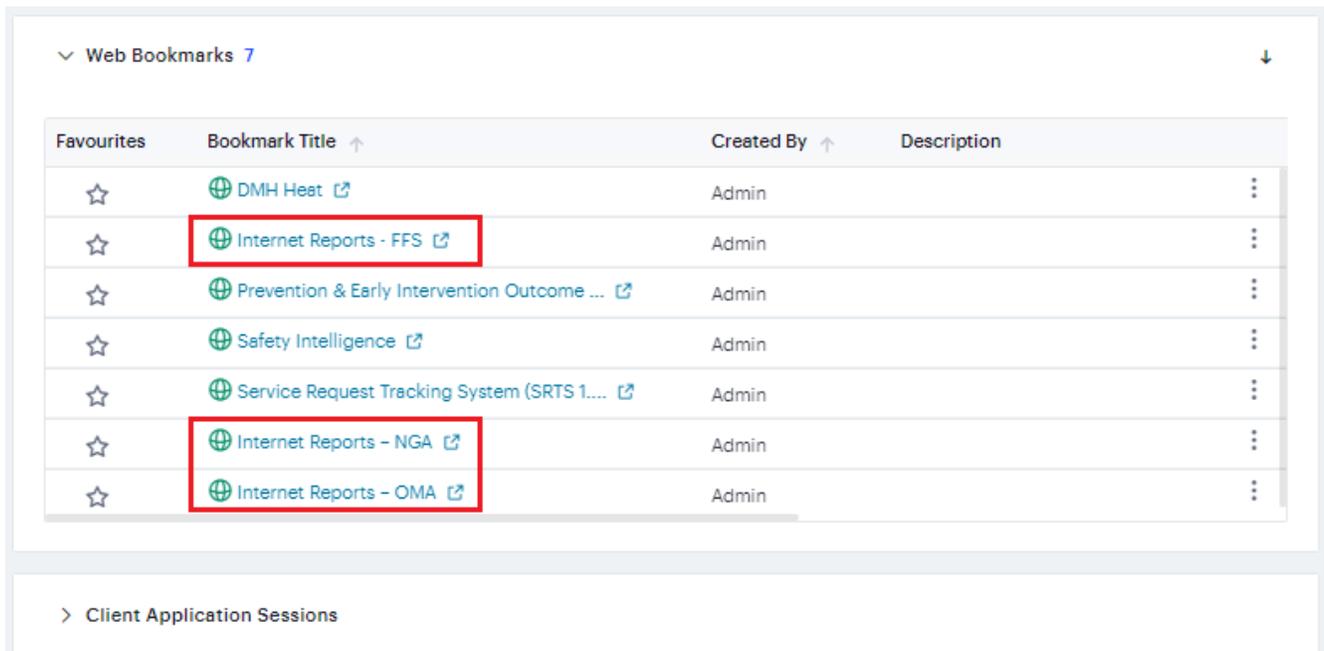

When the Host Checker completes its validation scan, the LA County SSLVPN Web Portal interface will load successfully.

Expand the **Client Application Sessions**, click on the Start button to launch and initiate the SSLVPN connection within the Ivanti Secure Access Client.

Once connected to the VPN, click the link to **Internet Reports** specific to your line of business (e.g. FFS, NGA or OMA).

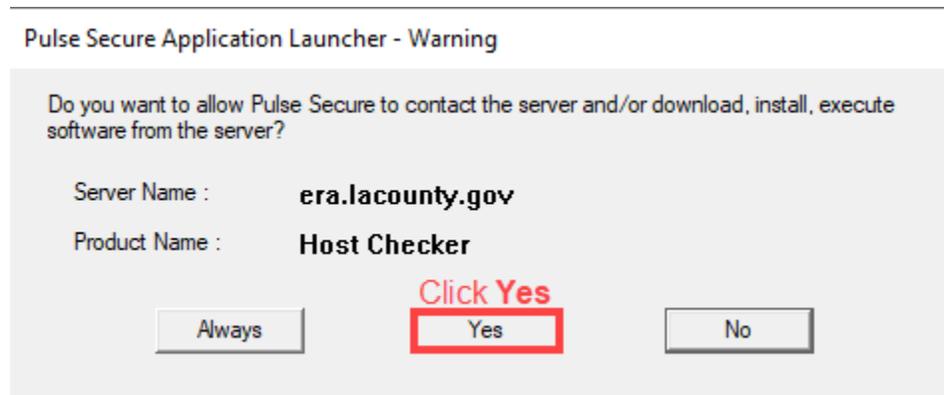

For returning users

You need to click on the link below and authenticate using their DMH Account (C#@dmh.lacounty.gov) in order to access the LA County SSLVPN site: <https://era.lacounty.gov/dmh/contractor/mfa>

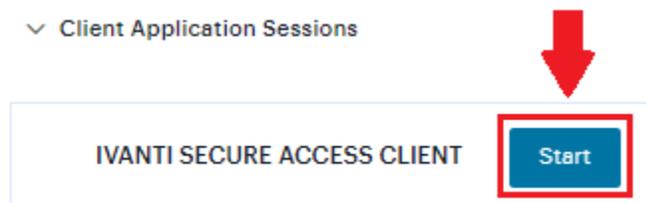

Allow the Host Checker software to confirm the computer meets the security qualifications to access the LA County SSLVPN page. (Note the green status light as confirmation of the Host Checker being installed and working properly.)

If prompted to allow communication to the era.lacounty.gov server, click Yes.

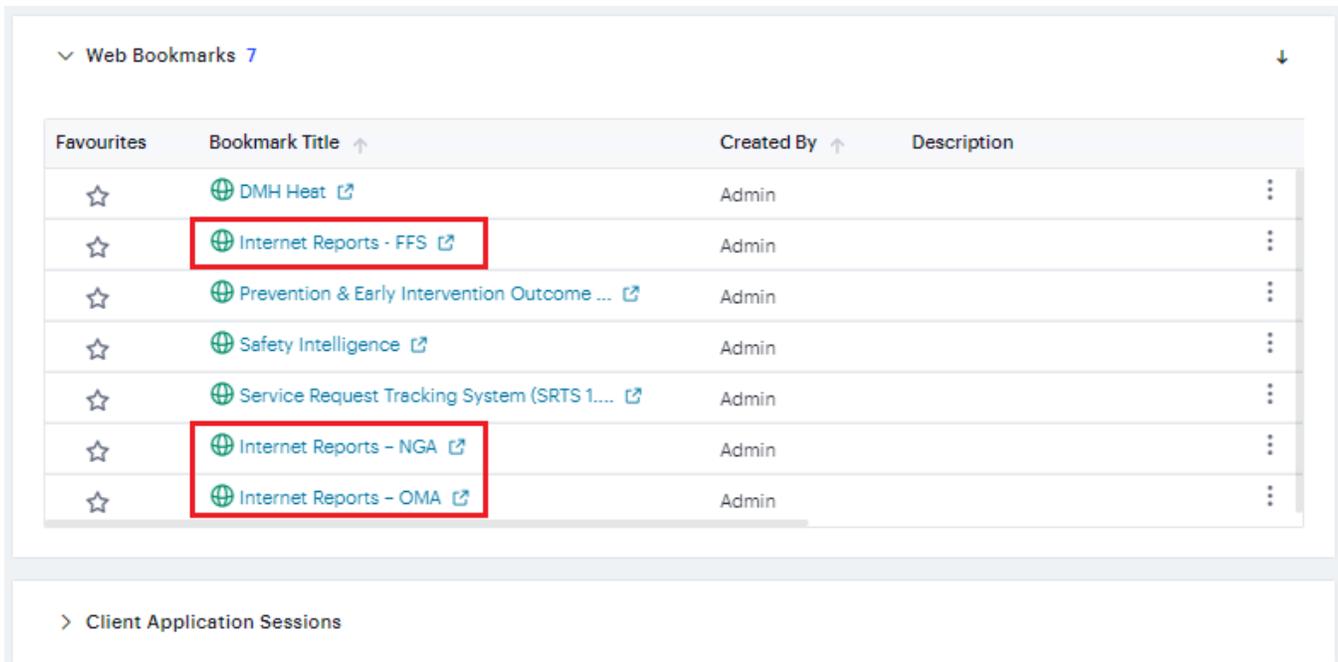

Click the Ivanti Secure Access Client "Start" button to establish a secure connection prior to clicking on a link for any of the Internet Reports.

If prompted to allow communication to the era.lacounty.gov server, click Yes.

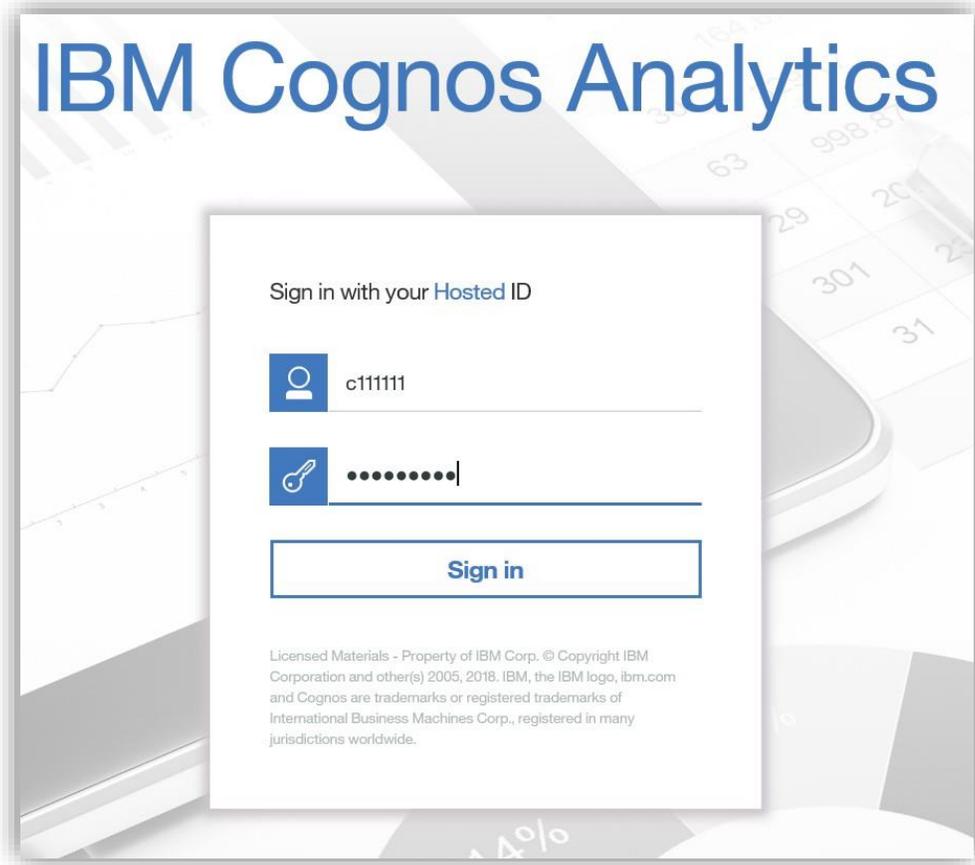

Once connected to the VPN, click the link to **Internet Reports** specific to your line of business (e.g. FFS, NGA or OMA).

IBM Cognos Analytics – DMH Contractor Login

Clicking the link to **Internet Reports** will direct users to **IBM Cognos Analytics Login** page.

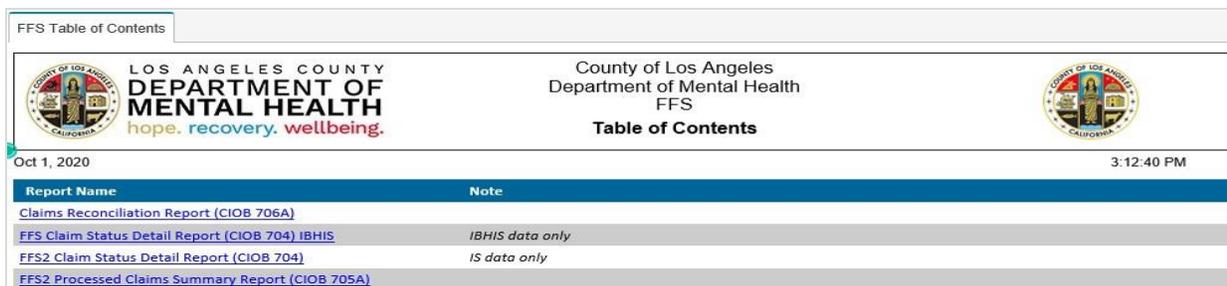

USERNAME: c+ContractorID **Example:** c111111
PASSWORD: Hosted Password

For password reset, please contact the DMH Help Desk at **213-351-1335**.

How to run a Report

After logging in, users will be directed to either **FFS Table of Contents**, **NGA Table of Contents**, or **OMA Table of Contents** page.

Current Employment Status - 1226	1226	This report lists clients current employment status based on current program and provider.
FSP Living Arrangement Report - 1236	1236	This report provides a list of clients and detail on their living arrangements pre and post partnership for enrolled and disenrolled clients, by provider and Program.

Make sure to specify all the required data in order to enable the **Finish** button. The example below shows the prompt page for FFS IS704 Report. Prompt page varies with the report selected.

How to use “Reset prompts and run” and “Refresh”

To allow the user to rerun the report view and choose different prompt values, click the Report Run button and select

Reset prompts and run.

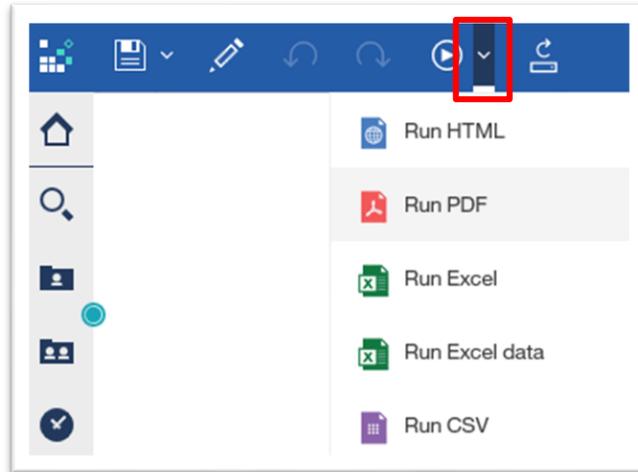

To refresh the report, click on the Refresh icon. This icon appears when you run a report.

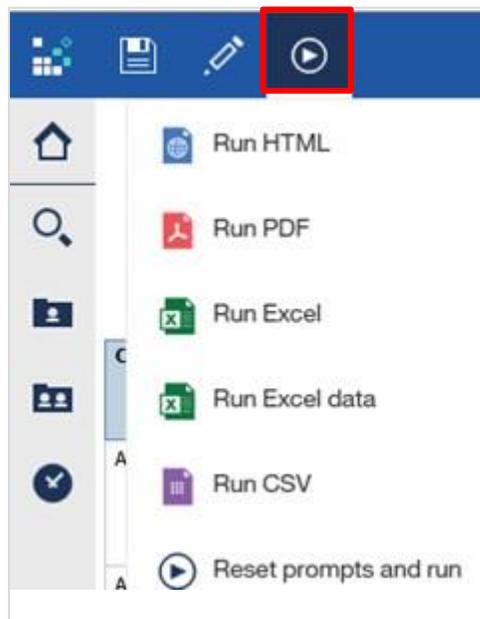

How to Run PDF, Excel, Excel data, CSV Report

There are two ways to extract and display the report as PDF, Excel, Excel Data, or CSV:

- 1) When the report is run for the first time, a drop-down arrow appears next to the Report Run button. Click it and select which format to run.

- 2) When the report is run multiple times, click the Report Run button and select the preferred format.

Report Formats

Users can generate reports in various formats. Each format has unique sets of properties as listed below.

Properties	Report Formats				
	HTML	PDF	Excel fully formatted	Excel Data minimal format	CSV delimited text
Conditional Style	Yes	Yes	Yes	No	No
Heading	Yes	Yes	Yes	No	No
Row Title(s)	Yes	Yes	Yes	Yes	Yes
Filter	Yes/No ²	No	Yes ¹	Yes ¹	Yes ¹
Sorting	Yes/No ²	No	Yes ³	Yes	Yes
Group/Ungroup	Yes/No ²	No	Yes	Yes	Yes
Current Date	No	No	No	No	No
Report with Summarized Data					
Is the summary format supported?	Yes	Yes	Yes	No	No

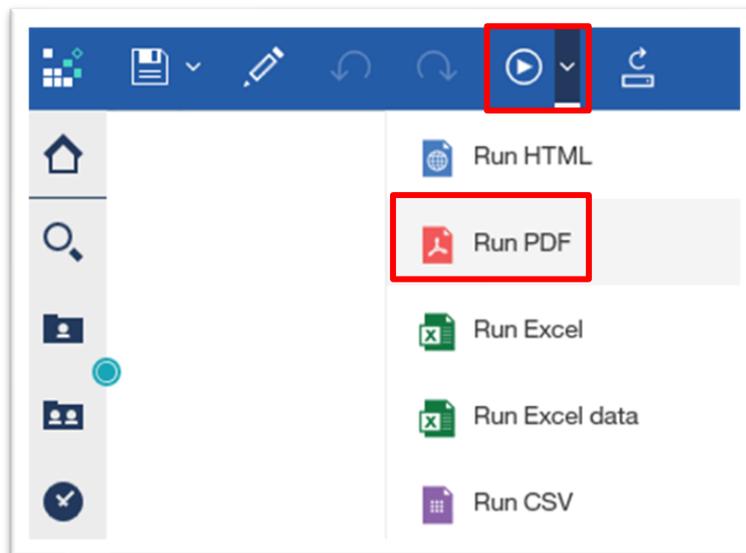

¹ Requires user to turn on filters in Excel.

² Ability to filter, sort, and group data depends on the report design.

³ Requires user to remove merged cells to have the ability to sort.

How to Print a Report

Run the report onto a printable format (e.g. PDF, Excel, Excel data or CSV) to print.

How to Close a Report

Click on the drop-down arrow beside the Title Name, and click “x” to close or exit out of the report.
